

**Tumbled Earth** **2018**

Each authentic stone has been hand collected from the rustic shores of the Kootenay River. The 22,000 stones were formed by glaciers and naturally tumbled by the water. The stones are as old as time but created into modern designs. When you wear a piece of Tumbled Earth you will feel an organic connection to nature and the land we are all a part of.

**Tumbled Earth is home to the Kootenay River Stone jewelry!**
